

## **Nicola Breytenbach – January 4, 1978**

Nicola has the Sun and Venus coupled in Capricorn, so while she is primarily business-like and practical, she is nonetheless an optimistic lover of life and romance, and well favoured with beauty and charm. Mercury in Sagittarius makes her open-minded and honest. The Scorpio Moon shows that she is often highly intuitive, but also quite stubborn about getting her way. Mars in Leo denotes impressive self-confidence, favours her with a stage personality and natural instinct for self-promotion. Jupiter in Gemini indicates love of travel and communication – implies that she easily absorbs knowledge; while Saturn in Virgo makes Nicola meticulous in attention to detail – also reliable and responsible. Uranus favours Venus so she is a spontaneous romantic, exciting to know, and widely popular.
